1) A Request for Continued Examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/29/2008 has been entered.

2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

3) (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4) Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by ITO (US 2003/0103634 A1).

ITO discloses a play back device as claimed in claim 7, comprising:

a first operation unit and a second operation unit for selecting at least one of the play-back sources to output play-back signals from a plurality of play-back sources (Fig.2, front

speakers IL and IR, Rear speakers 2L and 2R, headphone 4 and subwoofer 3. Fig.1, CDC, Radio 12 and Cassette Tape Player 13);

a control unit for deciding whether the first operation unit and the second operation unit select a common one of the plurality of playback sources and whether the play-back signals from the common play-back source is an output-stopped state (Fig.1, controller 20 selects playback sources between CDC ii, Radio 12 or Cassette Tape Player 13); and

for inhibiting the release of the output-stopped state when the control unit decides that the first operation unit and the second operation unit select a common play-back source and that the play-back signals from the common play-back source are in an output-stopped state (In this case, when user selects different output for second outputting unit, the common playback source is at output-stopped state and the audio still output at headphone 4, see figures 1,4 and 5).

5) Claims *1-6 and 8-24* are allowed.

6) Applicant's arguments with respect to claims *1-24* have been considered but are moot in view of the new ground(s) of rejection.
